

Clear Channel Communications owners of WDCG (G105) through their DJs "Bob and Madison", are placing at risk many hundreds of bicyclists in their listening area and potentially millions around the nation as their encouragement of violence towards cyclists spreads. Most, if not all of the stations in my area are owned by Clear Channel Communications.

It sounds like to me that that station in particular is using the public airwaves to encourage reckless and dangerous behavior from their listeners. It is possible that the station is keeping their words just below the minimum level to be charged with inciting hate crimes, but by allowing listeners to brag about the dangerous and illegal things they have done to cyclists on air, they are nonetheless influencing people's actions. There are some people who only carry out acts of violence so they can be rewarded by the Media's attention.

Please do what you can to discourage this. I have been verbally attacked and but for quick reflexes would have been physically attacked while cycling on several occasions and I don't want to be attacked anymore.
